PROFESSIONAL SUMMARY

Results-driven Data Engineer and aspiring Business Analyst with proven expertise in Power BI dashboard development, automation, and ETL pipelines. Skilled in translating business requirements into insights using Power BI, DAX, SQL, and Python. Familiar with Azure Data Factory and Power BI Admin Portal for monitoring and data refresh automation.

PROFESSIONAL EXPERIENCE

Data Engineer

Aug 2024 – Present

LTIMindtree, Kolkata

- Developed scalable ETL pipelines using SSIS and PySpark, integrating data from SQL Server and Excel.
- Created validated data models with SSAS and interactive dashboards in Power BI.
- Automated data refresh schedules and implemented dataflows using Power BI Service.
- Utilized Power BI Admin Portal to monitor report performance.
- Applied Power Query and DAX for advanced data transformations and calculations.

Software Developer

Oct 2023 – Aug 2024

LawaziaTech Pvt. Ltd., Pune

- Built backend automation workflows using Node.js, AWS, and OpenAI-based REST APIs.
- Implemented event-driven reporting using AWS EventBridge and Kafka.
- Integrated business data pipelines for real-time report generation.

PROJECTS

Global Superstore Sales Analysis: Developed a complete BI solution with ETL (SSIS), data modeling (SSAS), and automated Power BI dashboards.

Employee Presence Dashboard: Created real-time HR analytics dashboard using Power BI, Power Query, and DAX.
